DETAILED ACTION

Allowable Subject Matter

1. Claims 5-6, 9, 11-12 and 14-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor teaches that a method of fabricating a liquid crystal display device comprising various steps as claimed, more specifically, as the following:

using negative-type photoresist coating transparent conductive film with a thickness of 1 to 2 μm and soft baked at a temperature between 120°C to 150°C or 100°C to 125°C before exposure, and post exposure baking is conducted at a temperature of 125°C to 145°C, and development is conducted by an aqueous alkali solution for 60 to 120 seconds [claims 5 and 14 as shown in Fig.2].

The closest reference US 6,022,753 (Park et al) teaches that using negative photoresist to form pixel electrodes. However, the prior art of record do not disclose that the fabricating process to coat 1 to 2 μm transparent conductive film and soft baking at temperature of 120°C to 150°C or 100°C to 125°C before exposure, and post exposure baking at temperature of 125°C to 145°C, then development in such order as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
